WHAT YOU NEED TO KNOW **BEFORE** FILING A ZONING VARIANCE

Hardship:

The Jefferson Parish Comprehensive Zoning Ordinances were created and adopted into law in 1958. Some “lots-of-record” had obvious property hardships that prevented the ability to comply with all zoning requirements and therefore prevented the ability to obtain a legal permit to build.

Therefore, the Board of Zoning Adjustments was created to provide an outlet for possible relief where a property hardship existed. **ECONOMIC, PERSONAL, MAN-MADE REASONS DO NOT CONSTITUTE A HARDSHIP.**

Examples of property hardships:

Lot being narrow, shallow, L-shaped, pie-shaped, a parallelogram, substandard, etc.

Jefferson Parish Comprehensive Zoning Ordinance:

Article XLII, Section 40-793. Limitation of powers and standards for board action:

(2) Standards.

- a. In the consideration of all appeals and all proposed variances and/or exceptions requiring Board approval, under the terms of this ordinance, the board shall not grant approval unless if it makes a finding, based upon the evidence presented to it, as indicated in the record and the transcript of the hearing, that any of the following criteria exists:
 1. The approval, if granted, would cause diminution or depreciation of property values of any surrounding property or would alter the essential character of the locality.
 2. The approval, if granted, would tend to degrade or retard the prosperity and general welfare of the neighborhood and community.
 3. The approval, if granted, would be detrimental to the public welfare or seriously affect or be injurious to other property or improvements in the neighborhood in which the property is located, in that it will not: impair an adequate supply of light and air; or increase substantially the congestion in the public streets, create a traffic hazard, or permit inadequate parking; or increase the danger of fire; or substantially affect or overburden existing drainage or sewerage systems; or otherwise endanger the public safety; or cause serious odors, fumes, gases, dust, smoke, noise or vibration, light or glare, or other nuisances.
- b. Additionally, the Board shall not grant approval of any variance unless it makes a further finding, as indicated in the record or the transcript of the hearing, that each case shall indicate the following:
 1. Special conditions and circumstances exist which are peculiar to the land, structure, or building involved and which are not applicable to the other lands, structures, or buildings in the same zoning district; and the special conditions and circumstances do not result from the intentional actions of the applicant or any other person who may have or had interest in the property; and the strict adherence to the regulation for the property would result in a demonstrable hardship upon the owner as distinguished from mere inconvenience; or
 2. Literal interpretation of the provisions of this ordinance would deprive the applicant of rights commonly enjoyed by other properties in the same district under the terms of this ordinance; and granting the variance requested will generally not confer on the applicant any special privilege which is denied by this

ordinance to other lands, structures, or buildings in the same district or similarly situated; and the purpose of the variance is not based exclusively upon a desire to serve the convenience or profit of the property owner or other interested party.”

ARTICLE XXXIX, Section 40-742. Exceptions and modifications to use regulations.

(c) Fences.

- a. Required front yard areas may not be fenced or otherwise enclosed unless a variance is granted by the Board of Zoning Adjustments (BZA) in accordance with Article XLII, BZA, of the Comprehensive Zoning Ordinance and the following criteria are met.
 1. Fences may be permitted in the required front yard provided the fence meets the definition of an open fence or the portion above three (3) feet is an open fence and durable materials are used.
 2. All fences must be constructed in such as fashion so as not to obscure the view from adjacent property.
 3. Wood and metal fences and similar decorative fences may be used in conjunction with masonry, brick or similar opaque materials provided the solid opaque material extends no more than three (3) feet above the ground and columns extend no more than seven (7) feet in height and no more than eighteen (18) inches in width, depth, or diameter. Fence columns shall be spaced no closer than five (5) feet on center.
 4. **In granting or denying the request for a fence in the required front yard, the BZA may consider how the proposed fence conforms with the characteristics of existing fences in the immediate area and, except to maintain conformity with existing fences, a minimum setback of three (3) feet from the front lot line shall be provided. The immediate area is defined as consisting of both sides of the street or road within three hundred (300) feet from the subject property, as measured from the outer corners of the subject property’s front property line. The property owner or applicant shall provide documentation of existing fences to the BZA.**
- b. **Fences not meeting the above criteria shall not be permitted in the required front yard but may be permitted to enclose side and rear yards.**

How to acquire the list of owners within 100'/300'.

<http://geoportal.jeffparish.net/public>
2. Once on the GeoPortal site, go to search and put in the address where the variance is being applied for.
