Total Budget:

\$16,453,000.00

Disasters:**Declaration Number**

FEMA-4015-LA

Narratives**Disaster Damage:**

On August 28th, 2012 Hurricane Isaac made landfall in Louisiana near the mouth of the Mississippi River almost exactly seven years after Hurricane Katrina. For nearly three days, Jefferson Parish was impacted by hurricane force winds, torrential rainfall, and flash flooding. The storm surge reached up to 11 feet in some areas of the State. Flooding overcame the drainage and sewage infrastructure, causing waste and water to back up into residences. Across the State, more than 600,000 households were without power, and nearly all of the Greater New Orleans Area was affected. In Jefferson Parish, home to more than 400,000 people, the storm surge reached up to 6 feet. Jefferson Parish sustained the largest number of damaged homes from Hurricane Isaac in the State of Louisiana. 12,912 homes sustained storm damage according to FEMA's door-to-door inspections. The total estimated damage to the Jefferson Parish housing stock is over \$224 million. Of that damage dollar value, 63% occurred to households qualifying as low to moderate income population.

Recovery Needs:

The current unmet housing need in Jefferson Parish that can be directly attributed to Hurricane Isaac is staggering. Jefferson Parish has more unmet housing need than any other Parish in Louisiana at \$164,741,803.21. This is after a consideration of FEMA Individual Assistance, SBA Housing Loans, and paid hazard and flood insurance claims.

The Parish will concentrate its efforts in two areas. First, the Parish will strive to meet the housing needs of those residents who are historically underserved in disaster events: namely, the low to moderate income community, and especially the elderly and the disabled. The Parish believes that these residents bear the bulk of the burden of the unmet need still outstanding from Hurricane Isaac. The damage assessment shows the bulk of the need to be moderate repairs over a widespread area, and the housing assistance program is designed accordingly. The Parish will also strive to meet the increased need related to elevation and flood insurance premiums brought about by the 2012 flood insurance reforms. The Parish has determined that these reforms may have a negative impact on the historically underserved populations that its housing program targets, and that making assistance with flood-related issues available to this population is in the overall best interest of the Parish.

Secondly, the Parish has identified a deficiency in its sewage overflow capacity systems. During Isaac, the limited sewage processing capacity was overcome by the storm effects. This type of overflow directly impacts the entire Parish community and compounds the already devastating effects of any major storm event. Furthermore, the Parish has concluded that sewage overflow due to limited capacity especially harms the historically underserved populations targeted by its Program because those residents are the least able to leverage independent resources to repair the negative impact of sewage overflow. The Parish will use part of its direct allocation to address these capacity issues in order to prevent the recurrence of the unsafe and unsanitary living conditions that resulted from sewage overflow in Hurricane Isaac.
