

Leachate Removal From the Jefferson Parish

Sanitary Landfill

August 1 through December 31, 2018

As required by the Parish's Pretreatment Program discharge permit, the landfill is required to report monthly leachate volumes sent to the Bridge City Wastewater Treatment Plant. The graph below shows these volumes in gallons per hour. As illustrated, there has been steady improvement in the leachate volume removed from the landfill since August 1 when construction and maintenance activities were initiated by the Administration. We anticipate that these trends will continue as additional leachate pumps are put on line.
