Narratives

Disaster Damage:

On August 28th, 2012 Hurricane Isaac made landfall in Louisiana near the mouth of the Mississippi River almost exactly seven years after Hurricane Katrina. For nearly three days, Jefferson Parish was impacted by hurricane force winds, torrential rainfall, and flash flooding. The storm surge reached up to 11 feet in some areas of the State. Flooding overcame the drainage and sewage infrastructure, causing waste and water to back up into residences. Across the State, more than 600,000 households were without power, and nearly all of the Greater New Orleans Area was affected. In Jefferson Parish, home to more than 400,000 people, the storm surge reached up to 6 feet. Jefferson Parish sustained the largest number of damaged homes from Hurricane Isaac in the State of Louisiana. 12,912 homes sustained storm damage according to FEMA's door-to-door inspections. The total estimated damage to the Jefferson Parish housing stock is over \$224 million. Of that damage dollar value, 63% occurred to households qualifying as low to moderate income population.

Recovery Needs:

The current unmet housing need in Jefferson Parish that can be directly attributed to Hurricane Isaac is staggering. Jefferson Parish has more unmet housing need than any other Parish in Louisiana at \$164,741,803.21. This is after a consideration of FEMA Individual Assistance, SBA Housing Loans, and paid hazard and flood insurance claims.

The Parish will concentrate its efforts in three areas:

First, the Parish will strive to meet the housing needs of those residents who are historically underserved in disaster events: namely, the low to moderate income community, and especially the elderly and the disabled. The Parish believes that these residents bear the bulk of the burden of the unmet need still outstanding from Hurricane Isaac. The damage assessment shows the bulk of the need to be moderate repairs over a widespread area, and the housing assistance program is designed accordingly. The Homeowner Assistance Program will focus on smaller repairs while the Elevation Support Program will assist homeowners who are interested in raising their homes to mitigate against future disasters.

The Parish will also strive to meet the increased need related to elevation and flood insurance premiums brought about by the 2012 flood insurance reforms. The Parish has determined that these reforms may have a negative impact on the historically underserved populations that its housing program targets, and that making assistance with flood-related issues available to this population is in the overall best interest of the Parish.

Secondly, the Parish has identified a deficiency in its sewage overflow capacity systems. During Isaac, the limited sewage processing capacity was overcome by the storm effects. This type of overflow directly impacts the entire Parish community and compounds the already devastating effects of any major storm event. Furthermore, the Parish has concluded that sewage overflow due to limited capacity especially harms the historically underserved populations targeted by its Program because those residents are the least able to leverage independent resources to repair the negative impact of sewage overflow. The Parish will use part of its direct allocation to address these capacity issues in order to prevent the recurrence of the unsafe and unsanitary living conditions that resulted from sewage overflow in Hurricane Isaac. The Parish will address this infrastructure deficiency through an Emergency Pump Out Installation Initiative (EPO) that will serve all areas of the Parish.

Lastly, the Parish has identified impacts from Hurricane Isaac on the Parish's drainage infrastructure. These impacts were documented throughout the parish concentrating mainly on the hardest hit areas of the parish, the westbank including District 3, Crown Point, Barataria, and the Town of Jean Lafitte. During Hurricane Isaac, and immediately afterwards, some drainage pumps became inoperable or inaccessible, exacerbating flooding problems in the Parish. There was also high water that prohibited access to the stations to make repairs and/or fuel the generators. In addition, the heavy rainfall, and damaged drainage lines and pump station capacity, contributed to the flooding and subsequent de-watering of the area. These drainage lines caused a significant portion of the long-term impacts not only to the stations, but directly to these

communities. To address this, the Parish will implement the Hurricane Isaac Drainage Impro

Recovery Needs:

vement Program to address critical improvements to the Parish's drainage infrastructure on the West Bank.

Overall Progress Narrative:

Hurricane Isaac Drainage Improvement Program – WB Drainage Improvements on Paillet Ave., Estalote Ave., Esther St. and Brown Ave.

Construction started in January 2019 and reached substantial completion in April 2019. This project included the removal and replacement of a portion of existing drainage lines and inlets and replacement with larger sizes along Paillet Ave, Estalote Ave, Esther St. & Brown Ave between 34th St. and 36th St. in Harvey, LA, Jefferson Parish to increase flow capacity. Therefore, no activity during 3rdquarter 2020.

Hurricane Isaac Drainage Improvements Program – WB Drainage Improvements on Florence St., Paillet Ave., Estalote Ave., and Esther St.

During this quarter: Design is ongoing and grant consulting services continue. Jefferson Parish completed the project’s environmental assessment and made a Finding of No Significant Impact (FONSI). Jefferson Parish submitted a Request for Release of Funds to HUD. HUD authorization to use grant funds is pending. Design and grant consulting are being paid for with Parish funding. CDBG-DR funds will be used for construction only.

Hurricane Isaac Drainage Improvement Program – Town of Jean Lafitte

The Town of Jean Lafitte and the Jefferson Parish Department of Community Development (JPDCD) are working towards closeout on the Drainage Improvement Project. Change order 4 from the contractor has been reviewed by the Town of Jean Lafitte and JPDCD. An amendment to the agreement between Jefferson Parish and the Town of Jean Lafitte was executed to address the changes needed. The Town of Jean Lafitte and JPDCD are awaiting final invoices from the contractor and preparing for project closeout. Jefferson Parish did not expend funds on this project during this period. Jefferson

Parish expended \$358,100.81 on construction and \$11,385.00 to GCR for activity delivery for this project. Jefferson Parish drew down \$1,985,790.11, which corresponds to Voucher No. 485818 regarding this project.

Hurricane Isaac Emergency Pump-Out Initiative

Construction is complete and was accepted by Jefferson Parish Council on February 6, 2019. Therefore, no activity during 3rd quarter 2020.

Hurricane Isaac Homeowner Assistance Program and Elevation Support Program

During this program, twenty-two (22) properties thus far have been awarded secondary funding from the Elevation Support Program. Out of the twenty-two (22), twenty-one (21) properties have completed elevation and one (1) is near completion of being elevated. Continued meetings with JPDCD and JP Department of Hazard Mitigation are had regarding the applicants that received dual funding for elevation. Jefferson Parish expended/paid \$24,945.50 for the Elevation Support Program.

Also, during this quarter, the HAP applications transitioned into the pre-construction and construction phase. Resolution No. 136463 was passed by Council on October 14, 2020, which authorized the Department of Community Development to extend the contract with Bryant Hammett & Associates (BHA) until May 3, 2021. The contract was entered on June 18, 2019. Since then, BHA has provided construction management and procurement services related to existing damage to 23 housing units as a result of Hurricane Isaac for primary residences that have been deemed eligible within the HAP Pilot group. Out of the twenty-three (23) homes fifteen (15) have reached completion. Jefferson Parish expended/paid \$58,119.19 in construction cost for the Homeowner Support Program and \$11,633.00 to BHA for construction management for this project. Meetings continued with JPDCD and BHA regarding the pilot group. As of this quarter, twenty-nine (29) homes have been repaired through the Homeowner Support Program with the collaborative effort of BHA (15), NOEL (14), and Jefferson Parish. In addition, during this quarter, five (5) homes had their contract signing that amounted to \$15,907.02 in awarded funding. Jefferson Parish drew down \$30,217.13, which corresponds to Voucher No. 486359 regarding this project.

Hurricane Isaac Administration Activity

During this quarter, Jefferson Parish expended/paid \$37,209.04 in administration activity costs. These costs were for the following salaries, fringe benefits, and Parish appropriations.

Activity Description:

For Proposed Public Infrastructure Improvements in Jean Lafitte – Drainage Activities: Fleming Curve, Church Street and Gloria Drive

Location Description:

Proposed drainage and subsurface improvements to strategic areas which suffered inundation of water and wind impacts from Hurricane Isaac. All drainage improvements will utilize drainage materials which will increase the drainage capacity as well as mitigate for future disasters. All repairs shall be completed to account for a 10-year storm event in accordance with Jefferson Parish standards, and the drainage shall be tied into the existing drainage system.

Activity Progress Narrative:

Hurricane Isaac Drainage Improvement Program – Town of Jean Lafitte
 The Town of Jean Lafitte and the Jefferson Parish Department of Community Development (JPDCD) are working towards closeout on the Drainage Improvement Project. Change order 4 from the contractor has been reviewed by the Town of Jean Lafitte and JPDCD. An amendment to the agreement between Jefferson Parish and the Town of Jean Lafitte was executed to address the changes needed. The Town of Jean Lafitte and JPDCD are awaiting final invoices from the contractor and preparing for project closeout. Jefferson Parish did not expend funds on this project during this period. Jefferson Parish expended \$358,100.81 on construction and \$11,385.00 to GCR for activity delivery for this project. Jefferson Parish drew down \$1,985,790.11, which corresponds to Voucher No. 485818 regarding this project.

Activity Progress Narrative:

Hurricane Isaac Drainage Improvement Program – WB Drainage Improvements on Paillet Ave., Estalote Ave., Esther St. and Brown Ave.
 Construction started in January 2019 and reached substantial completion in April 2019. This project included the removal and replacement of a portion of existing drainage lines and inlets and replacement with larger sizes along Paillet Ave, Estalote Ave, Esther St. & Brown Ave between 34th St. and 36th St. in Harvey, LA, Jefferson Parish to increase flow capacity. Therefore, no activity during 3rdquarter 2020.

Hurricane Isaac Drainage Improvements Program – WB Drainage Improvements on Florence St., Paillet Ave., Estalote Ave., and Esther St.
 During this quarter: Design is ongoing and grant consulting services continue. Jefferson Parish completed the project’s environmental assessment and made a Finding of No Significant Impact (FONSI). Jefferson Parish submitted a Request for Release of Funds to HUD. HUD authorization to use grant funds is pending. Design and grant consulting are being paid for with Parish funding. CDBG-DR funds will be used for construction only.

Activity Description:

To provide rehabilitation in the form of elevation and home repairs that were attributed to Huircianne Isaac.

Location Description:

Scattered sites throughout Jefferson Parish impacted by Hurricane Isaac that are in need of rehabilitation.

Activity Progress Narrative:

Hurricane Isaac Homeowner Assistance Program and Elevation Support Program
During this program, twenty-two (22) properties thus far have been awarded secondary funding from the Elevation Support Program. Out of the twenty-two (22), twenty-one (21) properties have completed elevation and one (1) is near completion of being elevated. Continued meetings with JPDCD and JP Department of Hazard Mitigation are had regarding the applicants that received dual funding for elevation. Jefferson Parish expended/paid \$24,945.50 for the Elevation Support Program.

Also, during this quarter, the HAP applications transitioned into the pre-construction and construction phase. Resolution No. 136463 was passed by Council on October 14, 2020, which authorized the Department of Community Development to extend the contract with Bryant Hammett & Associates (BHA) until May 3, 2021. The contract was entered on June 18, 2019. Since then, BHA has provided construction management and procurement services related to existing damage to 23 housing units as a result of Hurricane Isaac for primary residences that have been deemed eligible within the HAP Pilot group. Out of the twenty-three (23) homes fifteen (15) have reached completion. Jefferson Parish expended/paid \$58,119.19 in construction cost for the Homeowner Support Program and \$11,633.00 to BHA for construction management for this project. Meetings

continued with JPDCD and BHA regarding the pilot group. As of this quarter, twenty-nine (29) homes have been repaired through the Homeowner Support Program with the collaborative effort of BHA (15), NOEL (14), and Jefferson Parish. In addition, during this quarter, five (5) homes had their contract signing that amounted to \$15,907.02 in awarded funding.

Jefferson Parish drew down \$30,217.13, which corresponds to Voucher No. 486359 regarding this project.
